

*The easiest way*

Parameter	Value
Weight [kg]:	15,5
Dimensions W x H x D [mm]:	220 x 350 x 200
Temperature range Min..Max [°C]:	-5 .. 40
Battery capacity [Ah]:	20
System voltage [V]:	24
Protection:	IP23
Output voltage [V]:	230
Output frequency [Hz]:	50
Output power [W]:	300 / 500
Type of output plug:	Type F CEE 7/4
Output voltage shape:	trapeze
self-reliance time [h]:	5,5 @50W
Inputvoltage of PV Modules [V]:	24
Power of PV Modules [W]:	≤ 500
Protection against Output short cut:	Given
Protection against Module short cut	Given
Protection against low voltage (batteries)	Given
Protection against overtemperature:	Given

HIGH PRICES FOR ELECTRICITY?

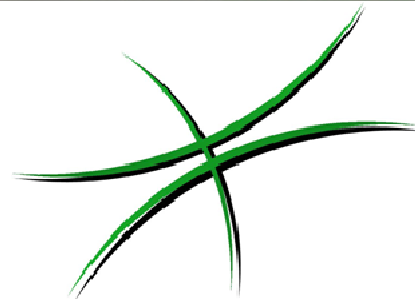

NO ELECTRICITY WHERE ON SITE?

AUTONOMY?

COMPLETE!

SIMPLE!

SAFE!

*Bite SUN in bags? -*

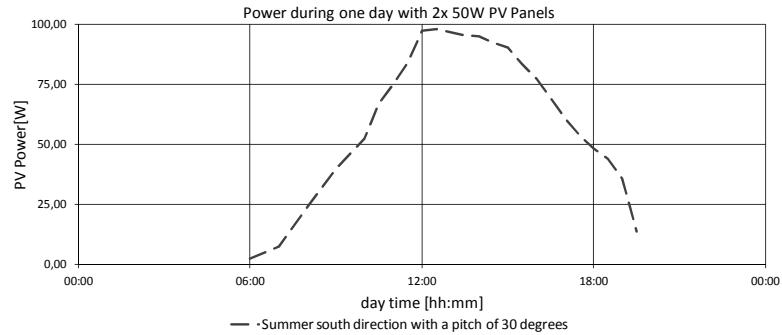

*NEVER!*

*Of course in*

*I-Mehr..!*

## What you can generate on one day:

## Miscellaneousness:

Use it where **YOU** need Power

- Balcony,
- Garden,
- Motor home,
- Camping,
- On job site.

You can take it away and you can carry it!

Equipped with two 50W panels it is possible to produce electricity to drive your TV set for more than 5 hours or to drive 13W energy saving bulb for more than 15hours.

**During the day** you can also drive a 500W device.

## What is I-Mehr:

*Unique in Value for money!*

*Protected by the **Deutsches Patent und Markenamt in Germany.***

***Flexible** by the **extensible PV** up to **500W!***

***Simple** like your socket at home. Your first step into your **autonomy!***
